Know your production count at any given time of the day.
The PROLINE PL-1001 Total Counter with Rate is perfect for displaying Actual Count and Rate on your production lines to allow you to know your production numbers real time

PL-1001

TOTAL COUNTER with RATE

Count up to 99,999,999 pieces on the bright seven-segment LED display and display the run rate. Includes 4" fixed range diffuse sensor, 3m cable, reset button, and power supply.

Rate is selectable; per Minute or per Hour via pushbutton
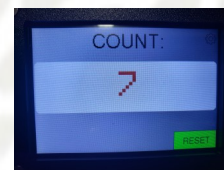

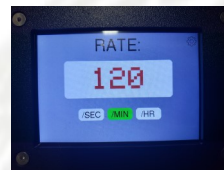

PROLINE

The PROLINE 2000 Series is a family of Counters and Timers used widely across many industries for many different applications. The bright 3.5" touch-screen provides easy to read graphics and simple navigation.

PL-2000

TOTAL vs. TARGET COUNTER with RATE DISPLAY

With 3 screens to choose from (all included) easily display Count vs. Target, Count only, Rate only, or Count and Rate.

Features include; heavy-duty ABS enclosure, flanges with mounting holes, 3.5" touch-screen, 2" range diffuse sensor w/ 3 meter cable, magnetic sensor mount.
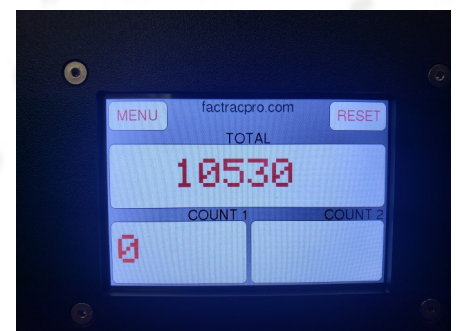

BATCH COUNTER with TOTAL COUNT

PL-2004

The new ProLine BC Counter is the perfect solution for batch counting and tracking total pieces. With the ability to add one input, you can batch count and track total pieces. One standard output has a N.O. and N.C. output to allow you to inhibit upstream/downstream devices or activate tower lamps, alarms, or provide an input to a host controller.

The output can be configured to latch on until reset or momentarily latch for a set time. The BC Counter comes with one input sensor w/ 3m cable and one 3m 4-wire output cable (flying leads).
