

Another innovative product from the leader in production counting solutions

PROLINE

DT-Timer

OVERVIEW

The ProLine DT-Timer is ideal for operations that need to monitor line back ups. The DT-Timer will detect via a photo-sensor that product on a production line is backing up. The DT-Timer will send an output to light a lamp, sound a buzzer, or signal another device in the event that the photo-sensor has been "blocked" for a period of time (normally open dry contact). The time is easily set via the touch screen and can be set to HH:MM or MM:SS.

FEATURES

Heavy-duty textured ABS enclosure

Easy to use and view

Add to any production line

Easy to mount

Overall dimensions 7.29L x 4.62W x 2.26H

INCLUDES

Surface mounting flanges; 6.75" x 3.5"

115vac power supply

6" range diffuse reflective sensor w/ 3m cable and magnetic mount

3m output cable with flying leads (N.O. contact and remote reset)

OPTIONS

Universal, adjustable sensor mounting with clamp and magnet

Other inputs including; retro-reflective sensors, metal detect prox sensor, mini-limit switch, push-buttons, foot pedals, and more

30, 50, and 100-foot Patch cable extensions

Dynamic Timer
